HEALTHY - AGEING

You can benefit from the most powerful tool of Dr. Aslan's anti-ageing cure: GEROVITAL H3 @ injections and tablets.

Gerovital H3 is recommended for those who want to get older without getting old.

In the Fifties, Professor Dr. ANA ASLAN developed an improved PROCAINE compound, based on an original formula.

The complex effects of Gerovital H3 are due to its activity both at central and autonomic nervous system level and at cellular level, by stimulating tissue regeneration and by improving metabolic processes. Gerovital H3v is a powerful antioxidant, a free-radical quencher.

Delaying the ageing process and as a preventive and curative solution for chronic degenerative diseases, Aslan's treatment has been shown to be efficient in all of the following: chronic fatigue syndrome; problems concerning attention, concentration and in balancing neuro-vegetative dystonias; sleep disorders; osteoarthritis, degenerative rheumatism, osteoporosis; sexual management and improving sex drive; cerebral and peripheral arteriosclerosis; moderate and light depression; the treatment of post-infarct patients and hemiplegia; Parkinson's, alopecia, and skin ageing.

GeroVital 12-Day Programme - 1300 Lei

The programme includes the allergy tests, Gerovital shots, 2 Balneo Therapies/day ,
Medical check-up, ECG, blood and urine check-up

GeroVital18-Day Programme – 1750 Lei
